ENACTMENT OF PHASE ONE DROUGHT CONTINGENCY PLAN

For Release on Wednesday July 26, 2017

**Contact: Frank Menefee, Jr.
La Grange Utilities
979-968-3127**

The City of La Grange is enacting Phase One of their Drought Contingency Plan. The triggering criteria which has initiated this action are the current weather predictions that indicate a long dry period with little relief in the foreseeable future. Phase One is defined as a “Mild” drought condition. Although Actions/Restrictions under this condition are all voluntary, we do stress their importance and highly encourage all La Grange Utilities water customers to participate by complying with the following guidelines:

If you are currently watering we ask that you water no more than every 4th day. Additionally, when you water every 4th day, water only between the hours of 8:00 p.m. and 10:00 a.m. If you have an automatic sprinkler system, please adjust it to fit within this schedule. We will be contacting major commercial water users and requesting that they reduce water consumption if at all possible. Additionally, any way you can see to voluntarily reduce water usage we ask that you do.

We are in Phase One-Mild Drought Conditions at this time and if we all work together I believe we can avoid going to the next phase, which is defined as Moderate, under which the Actions/Restrictions would become more severe and they would all become mandatory. We thank everyone in advance for their attention to this matter.
