PUBLIC NOTICE OF DISINFECTANT LEVEL QUARTERLY OPERATING REPORT

The City of La Grange water system PWS ID 0750003 has violated the monitoring/reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the first quarter of 2018 monitoring period.

We are taking the following actions to address this issue. **The City of La Grange properly disinfected the water before distribution, maintained acceptable disinfection residuals within the distribution system, and monitored the disinfectant residual at various locations throughout the distribution system, but did not report the results of that monitoring to the TCEQ during the first quarter of 2018. The City of La Grange has since sent the report to TCEQ to be back in compliance.**

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Frank Menefee, Jr. at 979-968-3127.
